

La collezione Badura a Room Service

## ALTAROMA AND THE NEW WAVE OF CONTEMPORARY CRAFTSMANSHIP

**Altaroma Altamoda**, under the direction of Silvia Venturini Fendi, is a project based on the importance of craftsmanship as well as the rediscovery of old trades through exhibitions and events in the most charming of the locations in the Italian capital. New paths inside the town of Rome lead the international audience to **Altaroma** – Rome fashion week – to visit old libraries, secret gardens, historical hotels and even incredible storage spaces.

**Aleksandra Badura** presented her bags and accessories collection, precious leather goods, in one of the Room Service areas under the name of Badura Roma. "I decided to present my collection in Rome because it's an incredible city, which inspires me and surprises me every day . The old buildings and the architectures, the works of art inspire me, suggesting new shapes and colours for my collection. My collection gets its inspiration from my journeys, real and imaginary, and carries with it memories from far away countries. Each bag and accessory is entirely handmade. Cuts, reinforcements and sewing, requiring hours and hours by master craftsmen and inspired by the cuts of precious stones".
